

SUPERIOR CORROSION PREVENTION

50 YEARS OF SUPERIOR CORROSION PREVENTION

Established in 1966, Ferro-Clean has consistently exceeded the expectations of its industry partners when it comes to the treatment and protection of steel. Ferro-Clean's unrelenting commitment to quality and reliability has seen the organisation expand to become a West Australian leader in abrasive blasting and protective coatings.

Ferro-Clean has expanded in alignment with the strong mining sector and the diverse construction projects within Western Australia to establish a reputation second to none in protecting structural steel from corrosion.

Ferro-Clean leverages across three custom designed production facilities within Perth Metro district to deliver state-of-the-art blasting, processing, materials handling and spray technologies. See our Capacity Statement for our impressive line-up of equipment and facilities - ready to meet your needs.

Ferro-Clean attained ISO9001 accreditation in September 2015, with no minor or major NCR's in the audit by Bureau Veritas. This adds to Ferro-Clean's NACE 2 certification and helps to reinforce to the end client or project manager that the job is in safe and capable hands.

ABRASIVE BLASTING AND PROTECTIVE COATINGS MADE EASY

TOTAL QUALITY AND ON TIME DELIVERY ARE ALWAYS PRIORITY NO. 1 FOR FERRO-CLEAN ON YOUR PROJECT

At Ferro-Clean, we understand the demands of stringent work schedules and the need to maintain supply of steelwork to site to ensure maximum productivity and minimal downtime. You can be confident that projects entrusted to Ferro-Clean will be done right the first time. There's nothing like the peace of mind knowing you can achieve superior corrosion prevention whilst keeping your projects on schedule and on budget.

THE FERRO-CLEAN SUPERIOR EXPERIENCE

- > All-weather painting facilities to ensure the agreed delivery dates are met
- > Dedicated structural steelwork facility with handling equipment and large loading capacity
- > Dedicated facility & production line for handrail, bollards, walkways and mesh guards
- > Able to accommodate difficult pipe-work, ducting, chutes, and transportable building frames over 30 x 6 metres in size
- > Fittings and componentry processed separately to avoid delays or missing items
- > Quality assurance documentation to the client's requirements
- > Strong working relationship with builders, project managers, client inspectors and expeditors
- > Skilled and trained permanent staff who take pride and care in every job
- > Commitment to 'Done Right and On Time!'

MINIMISE RISK ON YOUR NEXT PROJECT

Ferro-Clean's attention to detail ensures all factors are considered when scheduling a job. Everything from small parts like safety guards, brackets and fittings right through to massive multi-tonne structural frames and components are all accounted for with Ferro-Clean's production management system. With on-time delivery and no holdups you can rest assured your job will be processed 100% to specification, ready for assembly on your project, eliminating costly delays and unwanted headaches.

SUPERIOR COATING APPLICATION

STRUCTURAL STEEL

Ferro-Clean has undertaken an extensive portfolio of structural steel processing and coating works for significant projects throughout Australia. Well thought out processes have been expanded and refined to produce a system capable of delivering high quality and quantity simultaneously. Because Ferro-Clean handles large amounts of structural steel, the scale of economy means it can be provided at cost-effective rates. What's more, having the steel ready for despatch on the promised day ensures site hold-ups, inspection issues and transport delays become a thing of the past. That's the Ferro-Clean difference.

Ferro-Clean has successfully completed structural steel for projects such as:

- Shopping Centres
- Restaurants
- Office Buildings
- Mining Infrastructure
- Sports Arenas
- Department Stores
- Residential Developments
- Warehouses

See the Case Studies on our website or contact us for more information.

“On behalf of all of us here at Monadelphous, thanks for the great work on the Cape Lambert Projects. It was a combined effort to deliver the project as successfully as it has been and your contribution towards this is greatly appreciated.”

Senior Project Engineer

HANDRAILS & SAFETY ITEMS

FERRO-CLEAN ARE KNOWN FOR ATTENTION TO DETAIL AND THE CONSISTENT, HIGH QUALITY FINISH.

If first rate quality, consistency and superior protection are priorities for your project, Ferro-Clean has the systems and equipment in place to guarantee consistent top quality coatings for all your Handrails and Safety components.

All your needs can be catered for at Ferro-Clean's custom designed facility, dedicated to processing handrail & safety items. The reputation of quality, aesthetics, and attention to detail combined with high production capacity, give the ultimate results.

FERRO-CLEAN'S DEDICATED WORKSHOP CAN PROCESS:

- > Handrails
- > Bollards
- > Guards & Posts
- > Platforms
- > Monorails
- > Ladders & Stairs
- > Gates & Fittings
- > Walkway Mesh
- > Kickplate & Grating
- > Height bars
- > Road Barriers
- > Crane Beams
- > Lifting Bars
- > Light Poles
- > Chains & Mesh
- > Crates & Bins
- > Balustrade
- > Vinyl & Stencil Lettering

“Ferro-Clean have been our painter of choice for over 10 years. Competitive rates added to the consistency of quality painting and packing has enabled Nepean to form a valued partnership with the Ferro-Clean team.”

COMPONENTRY

Ferro-Clean has a dedicated department to ensure smaller items and fittings are not overlooked. Quantities of componentry including castings, splice plates, brackets, shims and more are processed consistently and efficiently with specialised equipment. Tailored to your individual requirements, items can be coated after blasting or simply processed in preparation for welding, galvanising, powder coating, crack testing or inspection. At Ferro-Clean, the choice is yours.

PIPING & DUCTING

Ferro-Clean's diversified facilities allow for major pipe spooling and ducting contracts. With handling facilities to unload cradles of spools and process lengths of over 24 metres, Ferro-Clean offers unique solutions for challenging projects.

See the case study on our website about the recent piping & ducting work for the Cape Lambert project.

FIREPROOFING SYSTEMS

As a result of strenuous training and product testing, Ferro-Clean now offers workshop-based fireproofing application for structural steelwork. Multiple suppliers and products have been tested to ensure a reliable and cost-effective service is provided. Ferro-Clean is an approved applicator of Cafco™ products, and has processed numerous large projects in this system. The 50 years of experience in applying coatings is an excellent base upon which Ferro-Clean can expand and fulfil the need in the WA market for an applicator who will provide the quality and expertise required to meet a delicate and challenging paint specification.

Speak to our coatings experts today to discuss your fireproofing requirements.

What Next?

If you are serious about finding a protective coatings partner you can rely on for your next project, make sure you talk to Ferro-Clean.

For a streamlined accurate quotation for your project, we recommend you supply the following information:

1. The details and drawings of your project
2. The scope and applicable specifications
3. The timeframe and delivery schedule requirements

And if you have any questions simply call us on 08 9452 9700. We are happy to help you out with any technical queries and how we can assist you in making your next project a success!
